

- 12) Set the background. Right click on the background on the home screen, personalize, background, solid color, cool blue.
- 13) Screen saver. Start -> search for "screen saver" 3D text, 10 minutes.
- 14) It is strongly suggested that before any contest a hot spare computer be setup and run as part of the network and contest log so it is almost ready to replace a failed computer mid-contest. The com ports for Radio control and WinKeyer will need to be set in N1MM+ Logger. Even if there isn't a computer failure having another computer logging the contest via the network is good insurance and allows off duty ops to monitor contest progress away from actual operating positions.
- 15) Right before any contest and certainly after a Microsoft "Tuesday" somebody needs to check for WIN10 updates and install. Ditto for N1MM+ Logger updates.
- 16) All computers on the PJ2T contest network need to always be running the same version of N1MM+ Logger.
