

ASUS RT-AX3000 Router Setup

30 Jan 24
D

- WTS initially set up login routerlogin 12345678
- I changed it to admin PJ2T599#
- remote access enabled in "Administration"

https://router.asus.com:8443 Port 1024-65535
(Still need to port forward this in Sercomm.)

• DDNS setup:

- at no-ip I created host name signalpointasusrouter
- no-ip geoffhoward awrtup - extend WAN IP ✓ Yes to WAN IP & Hostname verification
- update every 30 minutes

• DHCP Pool

set DHCP pool 192.168.0.2 → 192.168.0.200

- In Sercomm router set up one new port forward:

Asus Router Remote Login 192.168.0.1 TCP 8443 8443

- In Sercomm - turned PJ2T-Guest-24 Off

- In Asus set up PJ2T-Guest-24 WPA2-Personal AES
- works: all Rings came up

- In Sercomm turned all WiFi Off

- In Asus set up Howard WPA2-Personal AES
Howard 88888888

- In Asus chgd Howard to Howard ASUS

- Turned Wifi back on in Sercomm to reactivate Howard
- in Sercomm all wifi is off except

- Created in Sercomm HowardASUS GEOFFANDDOROTHY

- In Asus created PJ2T-Guest-5 30DC8E54F1
