

Config of PC 66 - New Optiplex 7020 for Remote Stn

PC66
25 Dec 25
①

- I read a BIOS msg that the 65 watt power supply needs to be 90w; I connected the correct supply
- It has C: & E: drives, 2386 B each
- I unlinked the cloud
- Microsoft acct ghoward@Kent.edu
- Anydesk / 655 613 565 for Electcraft K3 for unattended access
- Went to www.electcraft.com & downloaded & installed the KPA-1500 utility program

(see directions on how to configure on laptop in
Remoting / Remoting Engineering)
